

Solenoid/pneumatic valves, Tiger 2000

Solenoid/pneumatic valves, Tiger 2000

Key features

FESTO

General information

- A complete and comprehensive range with 5/2-way and 5/3-way valves
- Poppet valve for monostable functions or piston spool for more complex versions with air spring and 5/3-way valves
- With flow-optimised internal functions for higher flow rates with the same width
- Pneumatic connections G1/8, G1/4, G3/8
- Diverse and flexible, side and front mounting
- Pneumatic or electrical actuation
- Versatile connection technology with F or V solenoid coil with low power consumption, even for mounting on valve terminals
- Functional and timeless design, enclosed front housing

Solenoid coils

F solenoid coils

Voltage:

- 12 to 230 V DC
- 12 to 240 V AC (50 to 60 Hz)

Power consumption:

- 4.5 W

- For all MFH valves
- Selected types in accordance with ATEX directive for potentially explosive atmospheres
- www.festo.com/en/ex

- Solenoid coil can be easily exchanged later
- Solenoid coil not included in scope of delivery

V solenoid coils

Voltage:

- 24 V DC

Power consumption:

- 2.5 W

- For all MVH valves
- Low heating

- Solenoid coil included in scope of delivery

Manifold assembly

With PAL manifold rail

With PRS manifold block

The Tiger 2000 valves (without an ATEX category) can be mounted on PAL manifold rails with a common supply port or on PRS manifold blocks with a common supply port and exhaust. The manifold rail and manifold block have 2 to 10 valve positions.

 Note

Valves for explosive atmospheres (ATEX category) are not suitable for mounting on PAL manifold rails or PRS manifold blocks.

Solenoid/pneumatic valves, Tiger 2000

Key features

FESTO

Valve terminals

Completely assembled valve terminal type 02, ready to be connected, available with Tiger 2000 valves (V solenoid coil).

Choice of connections:

- Main multipin plug
- Fieldbus connection for all common fieldbus protocols
- Autonomous with integrated control (PLC)
- For G $\frac{1}{8}$ and G $\frac{1}{4}$

Manual override for valves with V solenoid coil

Non-detenting (standard)

Press on the aluminium plate

Conversion to detenting actuation

1 Remove the aluminium plate

2 Using a screwdriver, simultaneously push and turn the exposed manual override

Blocking the manual override

1 Remove the aluminium plate

2 Turn the aluminium plate by 180° and reinsert it

3 The manual override is now blocked

Pilot exhaust air for valves with V solenoid coil

- 1 The coil end cap must not be turned when removing the seal
- 2 Seal inserted

Free pilot exhaust air
Unducted once the seal in the coil end cap is removed, with code 3 on the end cap always corresponding to ports 84 and/or 82 of the valve.

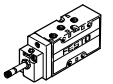

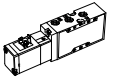

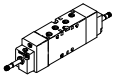

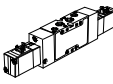

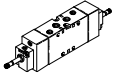

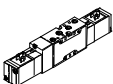

- 1 Seal removed
